

Qatar National Vision 2030

Launched during the reign of HH Sheikh Hamad bin Khalifa Al Thani. Serves as a transparent roadmap for Qatar's future. Focusing on balancing the accomplishments that achieve economic growth with the human natural resources. It guides Qatar's **human, social, economic** and **environmental development** future to ensure its inclusive and beneficial for citizens and Qatari residents.

The Qatar National Vision is based on four pillars (Human, Social, Economic and Environmental Development):

Human Development

Qatar cannot develop its economy and society without its human capital and resources: its people. Human development according to the QNV 2030 entails a holistic and modern health care infrastructure that caters to all and an educational system at par with the highest international standards, preparing Qatar's students to take on the world's challenges and become tomorrow's innovators, entrepreneurs, artists and professionals. Moreover, a world-class education system and equal opportunities will propel Qataris to increase their role in all sectors of their country's economy.

Social Development

Social development under the Qatar National Vision 2030 encompasses a system dedicated to social welfare and protection for all citizens and to bolstering women's role in society and empowering them to be active community members. Social advancement also means equal educational, employment and career opportunities for all citizens, regardless of their background or gender and a tolerant and fair society that embraces Islam's values of peace, welfare, justice and community. Under the QNV 2030, Qatar will serve as a regional and global example with an increased role in the Middle East and the world.

Economic Development

Economic development is an essential part of the Qatar National Vision 2030, as the engine that drives progress by providing better opportunities and a better way of life for the country's citizens. Achieving that objective hinges on Qatar's ability to create a balance between an oil-based and a knowledge-based economy, helping diversify the country's economy and guaranteeing a stable and sustainable business environment. The Qatar National Vision 2030 will also guide the wise management of the Qatari economy, helping increase competition, attracting more investments, and stimulating growth.

Environmental Development

Sustaining economic and social growth, moreover, is impossible without a holistic environmental vision that places environmental preservation for Qatar's future generations at the forefront. The Qatar National Vision 2030 aims to direct Qatar towards a balance between developmental needs and the protection of its natural environment, whether land, sea or air. As such, the QNV 2030 includes an emphasis on establishing an effective legal framework and the environmental institutions that can serve as the guardians of Qatar's environmental heritage. The QNV 2030 also emphasizes the importance of increasing citizens' awareness of their role in protecting the country's environment for their children and the nation's future generations.
